Course Name: Geographic Information System

Week 10 - Assignment 10 - (Jul-2026)

TYPE OF QUESTIONS: MCQ/MSQ

Number of questions: 10 **Total marks: 10x1= 10**

QUESTION 1

Minimum number of control points required for georeferencing in QGIS is _____.

a) One
b) Two
c) Three
d) Four

Answer: (c)

Detailed Solution:

At least three control points are required to accurately transform and align a raster image with real-world coordinates.

QUESTION 2

QGIS can be used to create which type of spatial features?

a) Point
b) Line
c) Polygon
d) All of the above

Answer: (d)

Detailed Solution:

QGIS supports the creation and editing of all major vector feature types including points, lines, and polygons.

QUESTION 3

The process of assigning real-world coordinates to a raster image is known as _____.

NPTEL

Course Name: Geographic Information System

Week 10 - Assignment 10 - (Jul-2026)

a) Digitizing
b) Rectification
c) Georeferencing
d) Classification

Answer: (c)

Detailed Solution:

Georeferencing links image pixels to actual geographic coordinates using control points.

QUESTION 4

CRS in GIS stands for _____.

a) Coordinate Reference Selector
b) Coordinate Reference System
c) Coordinate Raster System
d) Coordinate Registration Symbol

NPTEL

Answer: (b)

Detailed Solution:

CRS defines how spatial data is projected and represented on the Earth's surface.

QUESTION 5

Which statement about QGIS is correct?

a) QGIS is proprietary software
b) QGIS is open-source and cross-platform
c) QGIS cannot process raster data
d) QGIS is paid software

Answer: (b)

Detailed Solution:

QGIS is a free and open-source GIS platform that works on multiple operating systems.

Course Name: Geographic Information System

Week 10 - Assignment 10 - (Jul-2026)

QUESTION 6

Which option in QGIS is used to install additional tools and functionalities?

a) Import
b) Export
c) Plugins
d) Layout Manager

Answer: (c)

Detailed Solution:

Plugins allow users to extend QGIS capabilities with additional analysis and visualization tools.

QUESTION 7

Which file format is most commonly used for raster datasets in GIS?

a) JPEG
b) PNG
c) GeoTIFF
d) CSV

Answer: (c)

Detailed Solution:

GeoTIFF stores raster images along with geographic referencing information.

QUESTION 8

A toposheet with scale 1:25,000 contains _____ detail compared to a 1:50,000 map.

a) Less
b) Equal
c) More
d) No

NPTEL

Course Name: Geographic Information System

Week 10 - Assignment 10 - (Jul-2026)

Answer: (c)

Detailed Solution:

Larger-scale maps such as 1:25,000 show more detailed geographic information than smaller-scale maps.

QUESTION 9

In QGIS field calculator, area values are converted from square meters to hectares by dividing by _____.

a) 1000
b) 5000
c) 10000
d) 25000

Answer: (c)

Detailed Solution:

One hectare equals 10,000 square meters, so area values are divided by 10,000.

QUESTION 10

OpenStreetMap plugin in QGIS is mainly used for _____.

a) Database encryption
b) Raster interpolation
c) Base map and spatial data download
d) Georeferencing only

Answer: (c)

Detailed Solution:

OpenStreetMap plugin provides base maps and allows downloading spatial information for GIS analysis.
