Course Name: Geographic Information System

Week 07 - Assignment 07 - (Jul-2026)

TYPE OF QUESTIONS: MCQ/MSQ

Number of questions: 10 **Total marks: 10x1= 10**

QUESTION 1

Raw facts and figures collected for processing are known as _____.

a) Information
b) Database
c) Data
d) Knowledge

Answer: (c)

Detailed Solution:

Data refers to unprocessed facts and figures that can later be organized into meaningful information.

QUESTION 2

Organized and meaningful data is called _____.

a) Tuple
b) Information
c) File
d) Record

Answer: (b)

Detailed Solution:

When raw data is processed and arranged in a meaningful context, it becomes information.

QUESTION 3

A collection of related data stored systematically in a computer system is known as _____.

a) Spreadsheet

NPTEL

Course Name: Geographic Information System

Week 07 - Assignment 07 - (Jul-2026)

b) Database
c) Network
d) Report

Answer: (b)

Detailed Solution:

A database stores organized data in a structured manner for easy access and management.

QUESTION 4

The full form of DBMS is _____.

a) Data Binary Management System
b) Data Base Management System
c) Database Memory System
d) Digital Base Management System

Answer: (b)

Detailed Solution:

DBMS stands for Database Management System, which helps in storing, managing, and retrieving data efficiently.

QUESTION 5

Which of the following is NOT a component of a database system?

a) Query processor
b) Report writer
c) Key manager
d) Forms generator

Answer: (c)

Detailed Solution:

Key manager is not considered a standard component of a database management system.

Week 07 - Assignment 07 - (Jul-2026)

QUESTION 6

Which type of DBMS is most commonly used today?

a) Hierarchical DBMS
b) Network DBMS
c) Relational DBMS
d) Object-oriented DBMS

Answer: (c)

Detailed Solution:

Relational DBMS (RDBMS) is the most widely used database model because it stores data in tables and supports efficient querying.

QUESTION 7

A field that uniquely identifies each record in a table is called _____.

a) Foreign key
b) Secondary key
c) Primary key
d) Composite key

Answer: (c)

Detailed Solution:

A primary key uniquely identifies every record or tuple in a relational database table.

QUESTION 8

In object-oriented databases, the process of hiding data and restricting direct access is called _____.

a) Inheritance
b) Encapsulation
c) Identity
d) Binding

Answer: (b)

Detailed Solution:

NPTEL

Course Name: Geographic Information System

Week 07 - Assignment 07 - (Jul-2026)

Encapsulation protects object data by restricting direct access and allowing controlled interaction through methods.

QUESTION 9

The process of organizing database tables to reduce redundancy is known as _____.

a) Denormalization
b) Standardization
c) Normalization
d) Indexing

Answer: (c)

Detailed Solution:

Normalization reduces duplication and improves data integrity by organizing tables efficiently.

QUESTION 10

Which of the following is NOT a relational database?

a) Oracle
b) IBM DB2
c) MongoDB
d) Microsoft Access

Answer: (c)

Detailed Solution:

MongoDB is a NoSQL document-oriented database, while the others are relational databases.
